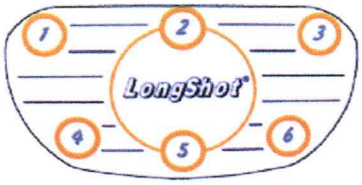
"Maximum Distance System"



Correction & Usage Instruction Guide

LongShot.

"Maximum Distance System"

IMPACT RECORDER INSTRUCTIONS

Attach the Recording label to a clean dry clubface, removing all wrinkles and bubbles. Align the Recorder center with the clubface center, fold any excess over the top and sides of the clubhead.

Always apply the *LongShot* Impact Recorder prior to the start of play or practice; this allows time for proper alignment and avoids any delays that could affect other players.

LongShot registers all impacts, including light putting strokes. Swing normally to produce accurate readings.

LongShot Impact Recorders should be changed when any confusion results (about 6-8 shots) from multiple impact readings. The Recorders leave no residue when removed soon after use.

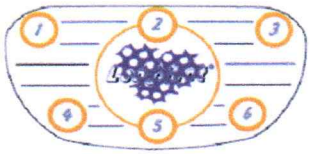
LongShot Impact Recorders do not add swing weight or hinder ball/club contact to any significant degree; making them ideal for all practice or in-round (not during competition) use.

LongShot Impact Recorders are **NOT** intended for or approved for, use during any competitive event.

For maximum benefit refer to the tips in the *LongShot* Correction Guide or take your impact recordings to a teaching professional to serve as a starting point for your lessons.

ALWAYS DISPOSE OF UNWANTED RECORDERS AND BACKING SHEETS IN A PROPER MANNER. DO NOT LITTER!

Missing the "Sweet Spot" by one half inch equals a 7% loss of distance!



Missing the "Sweet Spot" by one full inch equals a 15% loss of distance!

For those who have followed the tips listed (or are experienced enough to make your own corrections) and are now making solid contact ... *Congratulations!* By understanding your own habits and developing methods to correct your faults, you will have achieved lasting improvement. Continue to use the *LongShot* system during practice or whenever you begin to deviate from your new swing.

If, however, you are confused by how to use the feedback the impact readings provide or you are having trouble visualizing the correction tips, we encourage you to seek the help of a professional instructor. With your impact recordings as a starting point, a qualified teaching pro may be able to discover something you couldn't, starting you on the road to better golf.

- **LOWER SCORES!**
- **GREATER DISTANCE!**
- **IMPROVED ACCURACY!**

Don't Just Play ... Play Better!

No matter how bad a round of golf you've played, you always hit one shot that is so pure, so solid, that it keeps you coming back. That one effortless swing that felt so right has erased the round's bad memories and left you wondering how you can hit it that way more often. You have just experienced the power of "Perfect Sweet Spot Contact" ... the kind of contact that the pro player takes for granted and the rest of us continually seek.

The patented *LongShot* Impact Recorder ... the most used teaching and club fitting aid in the world and this Correction Guide, will help you harness your **Sweet Spot Power**.
